Fourth giCASES Dissemination Seminar/Workshop

Co-creation of knowledge and collaborative learning as tools to foster innovation in higher education and business

29th November 2017

Faculty of Natural Sciences, Salzburg

giCASES is a Knowledge Alliance project under the Erasmus+ programme of the European Commission. The project aims to enable and strengthen innovation in GI education and industry and to facilitate the collaborative creation, management and sharing of knowledge. These objectives are addressed by developing new, innovative and multidisciplinary approaches to teaching and learning within the Geographic Information (GI) sector, and by facilitating the exchange, flow and co-creation of this knowledge.

Objectives of the event

The seminar will bring together representatives from the consortium partners; representatives from universities and private companies active in the geospatial field, similar projects and other organizations. . A representative from the Austrian ERASMUS+ National Agency will also attend.

The objectives of the event are:

- To present the giCASES approach on case-based collaborative learning and co-creation of knowledge in the geospatial sector, the development of the pilot case studies and the first results of testing.
- To exchange ideas on existing or future initiatives, aiming to promote innovation or to facilitate co-creation of knowledge in the field.
- To discuss different perspectives on university-enterprise cooperation gathering the experience, opinion and wishes from representatives of leading private companies, GI experts and representatives from public stakeholders.
- To make a preliminary assessment on interest to apply the giCASES approach in other case studies and other disciplines or to use the giCASES learning material being developed.

Venue

Faculty of Natural Sciences, University of Salzburg ("Dekanatssitzungssaal" - 1. floor)
Hellbrunnerstraße 34 / 5020 Salzburg (AUT)

Time

Wednesday 29th November 2017, 9:30-15:00
